We also offer a number of polymer end sections within our YU.Drain FastDrain 75 product range. In a default configuration, an inspection hatch should be provided at either end of the conduit for maintenance purposes. If the circumstances do not permit the inspection hatch to be positioned at the very end of the conduit, the remaining part of the conduit can be closed off using an end-piece designed specifically to that end. We distinguish between both an end-piece on the left and one on the right.

An end-piece on the left has the edge on the left when this seal with the smooth surface is directed towards to the person viewing it (cf. picture).

MATERIAL PROPERTIES

Material:	PE – Polyethylene (C ₂ H ₂) _n
Density:	0,91-0,96 g/cm ³
Height:	134.4 mm
Width:	104.2 mm

WARRANTY PROVISION

If a component fails to operate correctly or should become faulty under normal use and within a period of one year from its date of installation, said component shall be repaired or replaced free of charge.

The following shall be excluded from this warranty provision:

- ▶ Improper application
- ▶ Transport damage
- ▶ Improper assembly
- ▶ Infringements of component and/or maintenance instructions.
